

COLORS

PRODUCT SHEET

Tadelakt can be colored according to one's needs and personal taste. For the coloring of Tadelakt it is essential to use pigments stable in the alkaline environment of the lime. Those of an inorganic nature (oxides and natural earths) have always been preferable for their beauty, color stability and durability.

COLORING

Coloring occurs during mixing. Add a maximum of 10% by weight of pigment compared to lime (maximum 100 g on 1 kg of lime). Disperse the pigment in water (1:1 ratio) adding a tablespoon of liquid soap, then add and mix thoroughly.
